

SIGNAL™: MetroTURBO_NEW

The associated projection of estimated coverage is based upon specific system requirements and parameters. This projection is intended to provide a **reasonable estimate** of coverage within a given area. However, no projection is 100% accurate. The actual coverage obtained can vary due to unknown terrain variations, foliage density, building density, building construction, and radio frequency interference. Therefore, this model is not a guarantee and may not represent actual coverage.
